## Policy on Second Dose Measles Vaccination

In order to comply with Oregon law regarding a second dose measles vaccination for college students, Linfield College has developed the following policy:

Every full-time student born on or after January 1, 1957 must provide the school with evidence of having received two doses of LIVE measles vaccine on or after his/her first birthday with a minimum of thirty days between doses. If month and year of the first dose are not available, documentation of the second dose in or after December 1989 must be provided. The dates must be accompanied by the student's signature.

Students may be exempt from the immunization if:

1. religious beliefs prohibit immunization
2. they have a medical condition preventing the use of the vaccine
3. they provide documentation of adequate measles titer
4. they provide documentation of having had the disease

It should be noted that Linfield College has required measles immunization for several years. Oregon law now mandates that the College set up formal procedures to insure compliance.

### Procedure

Linfield College will use the following procedure to assure compliance:

Each entering student will be required to present documentation of immunization or legitimate exemption, either by mail or in person, to the Student Services Office, located in Melrose Hall, room 110 before registration. The documentation must be signed by the student.

The Student Services Office will provide both the Registrar and Admissions Office with a list of students who have not proved evidence of compliance.

Students who are not in compliance will have a hold placed on their registration
