LEVEL 1 COURSE

Nur 310 Introduction to Nursing Care Strategies
Introduction to nursing as a profession. The philosophy of the Linfield College School of Nursing; the nursing process. Students as care-givers in providing simple nursing care of individual adult clients.
Prerequisite: Admission or progression to course in the Nursing Major.
8 credits (4 credits theory and 4 credits lab)

LEVEL II COURSES

Nur 302 Nursing Care Strategies II
Multi-simplex nursing care of the adult client within the context of family, group, and community. Application of the nursing process based on analysis of knowledge from nursing, sciences, and humanities.
Prerequisite: Level I. 6 credits (3 credits theory; 3 credits lab)

Nur 303 Clients in Crisis
Application of the nursing process in promoting, maintaining, and restoring optimal mental health across the life span in people with psychiatric problems. Provision of multi-simplex nursing care to individual clients in the context of families, groups, and communities.
Prerequisite: Level I. 6 credits (3 credits theory, 3 credits lab)

Nur 309 Research Methods in Nursing
An exploration of basic research processes including principles and methods related to nursing research. Emphasis on developing abilities to interpret and evaluate nursing research for applicability to professional nursing practice. Prerequisite: Math 103. 2 credits

Nur 390 Current Issues and Trends in Nursing
Participation of students and nurses from the community in a forum with renowned nurse leaders and leaders from related disciplines. Current issues and trends in professional nursing. Prerequisite: Level I 4 credits

LEVEL III COURSES

Nur 401 Family Focus Care I
Application of the nursing process to the complex nursing care of multidimensional individuals and families during the childbearing experience. Normal and abnormal
responses to childbearing. Prerequisite: Level II 5 credits (3 credits theory and 2 credits lab.)

**Nursing 402 Acute and Life Threatening Illness**  
The complex nursing care of groups of adult clients. Application of the nursing process to adult clients with multiple health problems. Prerequisite: Level II 5 credits (2.5 credits theory and 2.5 credits lab).

**Nur 403 Family Focus Care II**  
Application of the nursing process to the complex nursing care of childbearing children and families during the childbearing experience. Nursing approaches to health promotion during childhood and adolescence and selected alterations in health status. Prerequisite: Level II. 4 credits (2 credits theory and 2 credits lab)

**Nur 405 Family Focus Care III**  
The structure, function, and development of family systems. Use of the nursing process to guide complex nursing care that promotes, maintains, and restores wellness in families. Prerequisite: Level II 5 credits (3 credits theory and 2 credits lab).

**Nursing 406 Community Focus Care**  
Use of the nursing process with selected high risk populations within the community to promote wellness, prevent disease, maintain health, and maximize independence. Principles of community organization, ecology, and epidemiology. Prerequisite: Level II 3 credits (2 credits theory and 1 credit lab).

**Nursing 408 Nursing Leadership and Management**  
Overview of selected leadership and management theories and strategies, and their application to nursing care delivery in health care organizations. Prerequisite: Level II. 6 credits (3 credits theory and 3 credit lab).

*Total credit hours theory: 35.5  
Total credit hours lab: 22.5  
Total clinical hours: 945 (22.5 credits x 3 hours x 14 weeks)*
