

LINFIELD COLLEGE

Department of Computer Science

December 12, 2008

Dear Student

Welcome to CSC305: Software Engineering. The course, as you already know, is weekend course and will focus on software application development using object oriented analysis and design methodology. It is important you read this letter carefully.

Please find enclosed the course syllabus. Take some time and read through it carefully so that if you have any questions you can raise them during our first meeting.

For your early assignment before the class, thoroughly read through the attached course project to make sure that you understand the requirements specifications (What the system is going to be used for, or What the system will do). You will have to read it over and over again. Just one reading will not be enough. Produce a detailed list of what the system is going to do or be used for.

Sincerely,

Martin Dwomoh-Tweneboah
