Overview

Course Description: Developing nursing practices effectively with clients across the life span in a variety of mental health settings. Exploring societal concerns related to staying healthy, adapting to illness, developing and maintaining human relationships, and addressing mental health problems.

Course Outcomes

- Demonstrate respect for client diversity and individuality.
- Promote mental health in society.
- Practice effectively in a variety of mental health settings.

Faculty will meet with staff before Day 1 for faculty orientation, then participate in ½ day student orientation. Faculty will provide evidence of TB testing, criminal background check, confidentiality statements and volunteer forms.
